

DATASHEET

An Unsupported Operating System is a Ticking Time Bomb

When you use a Linux distribution that is no longer supported by the vendor, you will not receive corresponding updates and patches putting your servers, your data, and your business at risk of a cyberattack.

Extended Lifecycle Support services from TuxCare protect your servers and help you stay compliant. An affordable monthly fee buys you the time you need to migrate to a supported OS or to upgrade to the newest version of your current Linux flavor.

Available for Major Enterprise Linux Distributions Past the EOL Date

CentOs

Oracle Linux

Ubuntu

What is Included in Extended Lifecycle Support?

Patches available soon after CVEs go public

The TuxCare team is famous for quickly delivering patches for critical CVEs right after each CVE goes public.

Easy setup, with no migration required

Run a single script. No reboot or interruption to operations is necessary. Simply sync to a new repository file.

Kernel and critical package updates

All Extended Lifecycle Support subscriptions include regular kernel updates plus updates for critical packages including Apache, PHP, MySQL, Glibc, OpenSSL/SSH.

Years of Support

Extended Lifecycle Support by TuxCare lasts 4 years beyond EOL dates at a minimum giving you ample time to migrate.

Attractive pricing

Starting at \$4.25 per server, Extended Lifecycle Support is easy on IT budgets.

ELS is a sensible way to buy time to migrate.

Pricing

Maintaining end-of-life software can be expensive, but TuxCare's Extended Lifecycle Support service for CentOS 6 is at least 20X less expensive than vendor support.

Starting at

\$42.50*

 per year

per Operating System
Installation a month
