

Enterprise Support for AlmaLinux

From the Team Behind AlmaLinux Since Day 1

Planning to run AlmaLinux or move your workloads from another distribution to AlmaLinux? Make the most of your deployments with AlmaCare!

With support from AlmaCare, you'll get a commercial repository with **up to 16 years of support coverage** and benefit from optional, but highly valued, extensions that enable you to:

- Keep your OS up to date with automated security patches to comply with CIS Controls, NIST CSF, PCI-DSS, and ISO27001
- Eliminate the need for patching-related maintenance windows
- Make continuous FIPS 140-3 compliance painless
- Avoid paying costly upfront support package fees with simplified hourly support pricing

ESSENTIAL SUPPORT

- Commercial repository of all AlmaLinux updates
- Extended support for up to 16 years
- Expedited break/fix support for the AlmaLinux OS

Plus three independent extensions

Cybersecurity

Automate live patches with zero reboots and zero downtime

Compliance

Regular FIPS re-certifications and live patches that don't affect compliance

Enhanced Support

Enterprise-grade support with pay-as-you-go pricing in 5, 10, and 20-hour bundles

Adding AlmaCare support allows you to get the most out of your AlmaLinux systems, because it's delivered by the people who know AlmaLinux best: TuxCare, which is a division of CloudLinux Inc, the creator and founding sponsor of the AlmaLinux OS Project. AlmaCare allows you to minimize your vulnerability exposure and ensure compliance and business continuity – all while providing you with industry-leading support coverage that enables your organization to leverage this stable, reliable, community-driven Linux distribution for as long as it needs.
